NEW QUESTION: 1Adventure Works uses SharePoint to store product and order information. Product managers visit the Products list to see the status of each product. They request a feature that will allow them to easily see the recent and old product orders without opening the Products list. The products orders page is located at /sitepages/productorders.aspx, and the product order history page is located at /sitespages/productordershistory.aspx. Both pages require a query string parameter named ProductID.You need to add custom actions to the Products list by using the least amount of administrative effort.What should you do?**A.** Open the site in SharePoint Designer. Create a custom List Item Display Template and then apply it to the Products List View Web Part.**B.** Create a Windows Application and add a reference to Microsoft.SharePoint.Portal.CustomActions.dll and use the SPCustomActions class to add a custom action.**C.** Add an empty element to the SharePoint project. Add a <CustomAction> tag, set the Location element to EditControlBlock, and then use the <UrlAction> tag for a redirect to the custom page.**D.** Create a visual Web Part. Use a grid view with a template column and hyperlink, and databind the Products list. Add the Web Part to the allItems.aspx page of the Products list.**Answer: A****Explanation:**1. To add a menu item custom action feature to the app for SharePoint project Right-click the app for SharePoint project, and add a new Menu Item Custom Action item.2.Select the host web to expose the custom action and choose a list template and customlist as custom action scope to then click on Next button.3.Enter the menu item text you want to show and page in App where you want to redirectwhen the user selects the Menu item then click on the Finish button.**Example:**Note: When you are creating an app for SharePoint, custom actions let you interact with the lists and the ribbon in the host web. A custom action deploys to the host web when end users install your app. Custom actions can open a remote webpage and pass information through the query string. There are two types of custom actions available for apps: Ribbon and Menu Item custom actions.**Reference:** Custom actions in SharePoint 2013
