Purchase simply and easily online, Come to fight for your bright future and buy our C_ARSUM_2404 practice braindumps right now!

NEW QUESTION: 1Jocelyn has the responsibility of interviewing the candidates who have applied for an open position as a mechanic in an auto repair shop. As she meets and interviews the various candidates, she is not pleased with the potential employees that she encounters during this interview. One of the candidates, however, is a strongly built young woman with a tough demeanor. Despite this woman's limited resume and experience, Jocelyn decides that this particular candidate is the best employee choice because her appearance fits the image that the auto repair shop will need. In this, Jocelyn is demonstrating which of the following interview biases?**A. Similar to me****B. Stereotyping****C. Gut feeling****D. First impression****E. Recency**

Answer: B
Explanation:Explanation: In this case, Jocelyn is allowing a stereotyping bias (how she perceives a female mechanic) to guide her decision about which candidate will be best for the position in the auto repair shop. Answer choice B is incorrect because a similar to me bias occurs when the interviewer is influenced by similar interests or a similar background in the candidate. Answer choice C is incorrect because a recency bias occurs when the interviewer compares a candidate to the previously interviewed candidate. Answer choice D is incorrect because a first impression bias happens when an immediate impression of a candidate determines a decision. And answer choice E is incorrect because a gut feeling bias relies on a preference or intuition to make a decision about a candidate.

NEW QUESTION: 2You have been hired as a Database Consultant by ABC.com to design a SQL Server 2014 database solution.You are tasked with designing a scale-out and high-availability SQL Server 2014 Online Transaction Processing (OLTP) database solution that will maintain copies of data across two server instances.Your solution must provide scale-out of read operations by distributing the reads from clients across two SQL Server 2014 nodes. The data in both SQL Server nodes needs to be indexed.What should you include in your solution?**A. You should include two servers in a Synchronous-Commit Availability Mode Availability Group.****B. You should include two servers configured in an Active-Passive SQL Server 2014 Cluster.****C. You should include a primary SQL Server 2014 database that uses transactional replication to replicate data to the secondary database.****D. You should include a primary database with scheduled log shipping to the secondary database configured.****E. You should include two servers in an Asynchronous-Commit Availability Mode Availability Group.****Answer: C**

Explanation:Peer-to-peer replication provides a scale-out and high-availability solution by maintaining copies of data across multiple server instances, also referred to as nodes.Built on the foundation of transactional replication, peer-to-peer replication propagates transactionally consistent changes in near real-time. This enables applications that require scale-out of read operations to distribute the reads from clients across multiple nodes.Because data is maintained across the nodes in near real-time, peer-to-peer replication provides data redundancy, which increases the availability of data.

NEW QUESTION: 3When applying service-orientation principles during the service modeling process, the Standardized Service Contract principle is regarded as being of high importance because its application defines how service candidates can be assembled into service composition candidates.**A. True****B. False****Answer: B**

NEW QUESTION: 4A company wants a modular switch for the core layer of its mid-sized campus. The switch requires 32 10 G ports in a single switch with the ability to scale in the future. Which ArubaOS switches series is best suited for this role?**A.** Aruba 2930**B.** Aruba 3810 **C.** Aruba 5400**D.** Aruba 3800**Answer: A**
