NEW QUESTION: 3Your network contains an Active Directory domain named contoso.com. All servers run Windows Server 2012 R2. All sales users have laptop computers that run Windows 8.1. The sales computers are joined to the domain. All user accounts for the sales department are in an organizational unit (OU) named Sales_OU. A Group Policy object (GPO) named GPO1 is linked to Sales_OU. You need to configure a dial-up connection for all of the sales users. What should you configure from User Configuration in GPO1?**A.** Preferences/Control Panel

Settings/Network Options
B. Policies/Administrative Templates/Network/Network Connections
C. Policies/Administrative Templates/Network/Windows Connect Now
D. Policies/Administrative Templates/Windows Components/Windows Mobility Center

Answer: A
Explanation: Explanation/Reference: Explanation: The Network Options extension allows you to centrally create, modify, and delete dial-up networking and virtual private network (VPN) connections. Before you create a network option preference item, you should review the behavior of each type of action possible with the extension. To create a new Dial-Up Connection preference item Open the Group Policy Management Console. Right-click the Group Policy object (GPO) that should contain the new preference item, and then click Edit. In the console tree under Computer Configuration or User Configuration, expand the Preferences folder, and then expand the Control Panel Settings folder. Right-click the Network Options node, point to New, and select Dial-Up Connection. References:
