NEW QUESTION: 1When using a metal file, always remember to bear down on the forward stroke only. On the return stroke, lift the file clear of the surface to avoid dulling the instrument's teeth. Only when working on very soft metals is it advisable to drag the file's teeth slightly on the return stroke. This helps clear out metal pieces from between the teeth. It is best to bear down just hard enough to keep the file cutting at all times. Too little pressure uses only the tips of the teeth; too much pressure can chip the teeth. Move the file in straight lines across the surface. Use a vice to grip the work so that your hands are free to hold the file. Protect your hands by equipping the file with a handle. Buy a wooden handle and install it by inserting the pointed end of the file into the handle hole. When using a file-**A.** press down on the forward stroke**B.** wear protective gloves**C.** remove the handle**D.** always bear down on the return stroke**E.** move it in a circle**Answer: A****Explanation:**Explanation/Reference:Explanation:

NEW QUESTION: 2Which of the following access control models requires defining classification for objects?**A.** Role-based access control**B.** Discretionary access control**C.** Identity-based access control**D.** Mandatory access control**Answer: D****Explanation:**With mandatory access control (MAC), the authorization of a subject's access to an object is dependant upon labels, which indicate the subject's clearance, and classification of objects. The Following answers were incorrect: Identity-based Access Control is a type of Discretionary Access Control (DAC), they are synonymous. Role Based Access Control (RBAC) and Rule Based Access Control (RuBAC or RBAC) are types of Non Discretionary Access Control (NDAC). Tip: When you have two answers that are synonymous they are not the right choice for sure. There is only one access control model that makes use of Label, Clearances, and Categories, it is Mandatory Access Control, none of the other one makes use of those items. Reference(s) used for this question: KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the Ten Domains of Computer Security, John Wiley & Sons, 2001, Chapter 2: Access control systems (page 33).
