Fortunately, NSK101 training pdf vce, staying true to its mission to facilitate the subscribers to realize their dream, has a rather reasonable price.

**NEW QUESTION: 1** Which of the following is/are true about the MACRS? I. MACRS does not use economic life of an asset while calculating depreciation. II. Under the MACRS system, the depreciation expense is larger in the early years, leading to lower taxes. III. Depreciation under MACRS must be calculated using the accelerated depreciation method. **A.** I only **B.** I & II **C.** II only **D.** I, II & III **E.** II & III **F.** III only **Answer: B** Explanation: Explanation/Reference: Explanation: MACRS classifies assets into several classes based on a pre-determined length of time called the "recovery period." The recovery period, while positively correlated with actual economic life, does not track the economic lives of individual assets precisely. In particular, recovery periods are shorter than actual economic lives, leading to higher depreciation expenses and lower taxes. For long-recovery period classes (>27 years), straight-line depreciation must be used while accelerated methods may be used for shorter life assets.

#### **NEW QUESTION: 2**

大規模なエンタープライズネットワークのセキュリティエンジニアは、一定期間内にメンテナンスをスケジュールする必要があります。サーバーの合計停止期間は4時間です。ワークステーションは毎日午後8時から午前6時までメンテナンスを受けることができます。次のうちどれがメンテナンス作業のためのパラメータを指定できますか？（2を選択） **A.** 覚書 **B.** マネージドセキュリティサービス **C.** ネットワークサービスプロバイダ **D.** サービス品質 **E.** 運用レベル契約 **Answer: A, E** Explanation: B: A memorandum of understanding (MOU) documents conditions and applied terms for outsourcing partner organizations that must share data and information resources. It must be signed by a representative from each organization that has the legal authority to sign and are typically secured, as they are considered confidential. E: An operating level agreement (OLA) defines the responsibilities of each partner's internal support group and what group and resources are used to meet the specified goal. It is used in conjunction with service level agreements (SLAs). Incorrect Answers: A: A managed security service (MSS) is a network security service that has been outsourced to a service provider, such as an Internet Service Provider (ISP). In the earlier days of the Internet, ISPs would sell customers a firewall appliance, as customer premises equipment (CPE), and for an additional fee would manage the customer-owned firewall over a dial-up connection. C: Quality of service (QoS) is a mechanism that is designed to give priority to different applications, users, or data to provide a specific level of performance. It is often used in networks to prioritize certain types of network traffic. D: A network service provider (NSP) provides bandwidth or network access via direct Internet backbone access to the Internet and usually access to its network access points (NAPs). They are sometimes referred to as backbone providers or internet providers.
