SAP Certified Associate - Implementation Consultant - SAP Sales Cloud Certification.

NEW QUESTION: 1You need to configure the external content type to search for research papers.Which indexing connector should you use?**A.** .NET Type Connector**B.** SQL Server Connector**C.** WCF Service Connector**D.** Custom Connector**Answer: C****Explanation:**Topic 2, Lucerne PublishingBackgroundYou are hired by Lucerne Publishing to design and implement a new public-facing Internet site by using SharePoint. Lucerne Publishing also needs an intranet site to host sensitive documents and content.Business RequirementsInternetContent owners must be able to:Modify content in pages that are published for anonymous site visitors.Modify search engine optimization (SEO) properties to optimize visibility of the website.Create content in multiple languages and use automatic translation.----IntranetEach department must have its own site. Each department home page must display relevant information about the department and contact information for employees. Each user is encouraged to create their own blog, on which they will publish information about current projects and get feedback from other users in the company. Personalized content must be displayed for an employee when an employee accesses the intranet. The page must include a feed that displays updates from--- other users' blog posts. Technical Requirements Service Applications -The Internet and intranet web applications must use the Managed Metadata Service (MMS). Both web applications use a

separate MMS service application and do not share term sets.--The intranet web application uses the User Profile Service Application (UPA). The intranet uses all available social features of the UPA.Users follow, mention, and identify documents and people. Users often discuss news by using hash tags. You must develop an app part that allows the current user to show different top feeds from user profiles.HardwareThe hardware that hosts the Internet site must handle thousands of concurrent users.URLsThe following table lists the URLs that the SharePoint sites will use.Search Engine Optimization (SEO)- You must implement search engine optimization for the public-facing Internet site. SharePoint must produce a site map file.- You must publish data from the intranet site to the Internet web site by using cross-site publishing. You must define a catalog, add the data, and publish it to the Internet site.- You must create a custom tool that site collection administrators use to manage catalog connections. - You must define the API calls to remove or update existing catalog connections.FilteringYou must enable canonical URL filtering to improve ranking by Internet search engines. The Internet site that must use canonical filtering has the following URL:

<http://www.lucernepublishing.com/products/pages/products.aspx?productID=<num>&productCategory=<category>>You must define the filters that the site collection administrator uses.InternetYou publish the Internet site for multiple device types, such as mobile phones and tablet devices. The solution uses multiple master pages. Device channels select the master page to display based upon the capabilities of the device that connects to the site.The following table lists the device channels and master pages that the site uses.You create a Windows Phone app. When users access the site by using a Windows phone, a message must appear on every page of the mobile site. The message must notify users that they can download the Windows Phone app to their phone. The HTML that contains the message must render only to the Windows phones.IntranetEach department must have its own site collection. Each employee must have Reader permissions to their department site collection.Employees access the intranet site by using a wide variety of devices.Some employees report that the home page loads slowly. You investigate the issue and find out that the size of some images is very large. You must enable image renditions on the intranet site collection.You must develop an app part that displays information from the users' personal sites and news feeds.---- -Custom Development You design an application framework. The framework is used by other developers on the team. The framework must include entry points that are used to log errors and exceptions. You need the entry points. You create a custom Visual Web Part in a solution package. You deploy the solution package as a farm solution by using Windows PowerShell. An error message that includes a correlation ID displays when you add the custom Visual Web Part to a SharePoint site.----You must create a tool to maintain social links. The tool must:You develop a Windows Store app that synchronizes data between the intranet sites and the app to allow users to work offline.Performance Improvement--the company's intranet site.The SharePoint front-end web servers are load-balanced. Each request within aObjects that are cached must always be available, regardless of which front-endYou must monitor the amount of memory that is available and the number ofYou have not modified the Request Management configuration. You must implement caching in your custom code to improve the performance of - user session can be processed by different front-end web servers. - web server processes the request. - current requests for each server.

NEW QUESTION: 2
