NEW QUESTION: 1A. Option DB. Option BC. Option CD. Option AE. Option EAnswer: C,E

NEW QUESTION: 2DRAG DROPYou are developing a SQL Server Analysis Services (SSAS) multidimensional project that is configured to source data from a SQL Azure database.You plan to use multiple servers to process different partitions simultaneously. You create and configure a new data source.You need to create a new partition and configure SQL Server Analysis Services (SSAS) to use a remote server to process data contained within the partition.Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)**Answer:**
Explanation:Explanation:Box 1:Box 2:Box 3:Note:* You create a remote partition using the Partition Wizard. On the Specify Processing and Storage Options page, for the Remote Analysis Services data source, specify the dedicated database on the remote instance of Analysis Services. This instance of Analysis Services is called the remote server of the remote partition. For Storage location, you can specify the default data location for the remote server or a specified folder on the server.You must create an Analysis Services database on the remote server and provide appropriate security settings. An additional OLAP data source is created on the remote database pointing to the server on which the partition is defined. The MasterDataSourceID property setting on the remote database points to the data source which, in turn, points to the master server. This property is only set on a database that contains remote partitions.The RemoteDataSourceID property setting on the remote partition specifies the ID of the OLAP data source on the master server that points to the remote server. A remote

database can only host remote partitions for a single server.* Before you create a remote partition, the following conditions must be met:*

uk.co.certification.simulator.questionpool.PList@12ef9670*

uk.co.certification.simulator.questionpool.PList@12ef96e0*

uk.co.certification.simulator.questionpool.PList@12ef9720The domain user account for the local instance of Analysis Services must have administrative access to the remote database.

NEW QUESTION: 3 Which of the following are process elements for remote diagnostics? Each correct answer represents a complete solution. Choose all that apply. **A.** After detected performance degradation, predict the failure moment by extrapolation. **B.** Compare with known or expected behavior data. **C.** Perform analysis of data to detect trends. **D.** Remotely monitor selected vital system parameters. **Answer: A,B,C,D**
