As a result, these questions will not appear in the review screen. You support an application that stores data in a Microsoft SQL Server database. You have a query that returns data for a report that users run frequently. The query optimizer sometimes generates a poorly-performing plan for the query when certain parameters are used. You observe that this is due to the distribution of data within a specific table that the query uses. You need to ensure that the query optimizer always uses the query plan that you prefer. Solution: You add the KEEPFIXED PLAN query hint to the query. Does the solution meet the goal?**A.** No**B.** Yes**Answer: B****Explanation:**Explanation/Reference:Explanation:PLAN forces the query optimizer not to recompile a query due to changes in statistics. SpecifyingKEEPFIXED PLAN makes sure that a query will be recompiled only if the schema of the underlying tables is changed or if sp\_recompile is executed against those tables.References:
