Wish you good luck and be happy, You need to practice questions for a week at least to score well in the CDMP-RMD exam.

**NEW QUESTION: 1** DECLARE @traceEventId int = 122; DECLARE @traceColumnIdForTextData int = 1; DECLARE @durationFilter bigint = 100; DECLARE @databaseId int; SELECT @databaseId = DB\_ID('MyDatabase');  
**Answer:** Explanation: Explanation The following system stored procedures are used to define and manage traces: \* sp\_trace\_create is used to define a trace and specify an output file location as well as other options that I'll cover in the coming pages. This stored procedure returns a handle to the created trace, in the form of an integer trace ID. \* sp\_trace\_setevent is used to add event/column combinations to traces based on the trace ID, as well as to remove them, if necessary, from traces in which they have already been defined. \* sp\_trace\_setfilter is used to define event filters based on trace columns. \* sp\_trace\_setstatus is called to turn on a trace, to stop a trace, and to delete a trace definition once you're done with it. Traces can be started and stopped multiple times over their lifespan. References: <https://msdn.microsoft.com/en-us/library/cc293613.aspx>

**NEW QUESTION: 2** In Microsoft Dynamics AX 2012 which journal type should you use in the Journal name form if budgets for fixed assets are required?
