NEW QUESTION: 2 Yummy Doughnuts (YD) sells a variety of doughnuts and other related items through both company-owned locations and franchise locations. YD has experienced significant growth over the past five years. However, barriers to entry are low and competition is increasing. Linda Haas, CFA, follows YD for Gibraltar Capital. Gibraltar Capital prides itself on its thorough fundamental analysis of investment opportunities. The company uses a bottom-up approach to the investment process. Haas's security selection process utilizes residual income models to determine a stock's intrinsic value. Haas obtains YD's 2008 financial statements shown in Exhibit 1. In addition, Haas provides supporting information about YD's financials and other related material found in Exhibit 2. Haas makes the following statements during her YD presentation to the investment committee. Statement 1: Based on ROE mean reversion, YD's continuing residual income is assumed to decline to zero over time. Statement 2: The residual income model states that if YD's ROE equals its equity cost of capital, then YD's intrinsic value will equal its book value per share. Haas notes that the multi-stage residual equity income model captures more detail in calculating YD's intrinsic value. An assumption of the model is that ROE fades to the cost of equity over time, which is known as a persistence factor (varying from 0 to 1). Identify which characteristic indicates a higher persistence of abnormal earnings.

A. Low price to earnings ratio. **B.** High dividend yield. **C.** Low dividend payout. **Answer: C**

Explanation: Explanation/Reference: Explanation: It is difficult for a company to maintain a high ROE because of competition. The persistence factor will be lower for those companies. A company that has a low dividend payout has greater growth opportunities than a company with a high dividend payout. The greater growth opportunities should support a higher persistence factor. NEW QUESTION: 3 Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam. Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You plan to connect a virtual network named VNET1017 to your on-premises network by using both an Azure ExpressRoute and a site-to-site VPN connection. You need to prepare the Azure environment for the planned deployment. The solutions must maximize the IP address space available to Azure virtual machines. What should you do from the Azure portal before you create the ExpressRoute and the VPN gateway? **Answer:** Explanation: See explanation below. Explanation We need to create a Gateway subnet Step 1: Go to More Services > Virtual Networks Step 2: Then click on the VNET1017, and click on subnets. Then click on gateway subnet. Step 3: In the next window define the subnet for the gateway and click OK It is recommended to use /28 or /27 for gateway subnet. As we want to maximize the IP address space we should use /27.
