NEW QUESTION: 1 Which three properties of a user account drive data security within Oracle Applications? (Choose three.)
A. Securing Attributes
B. Direct Responsibilities
C. Password Expiration
D. Username and Password
E. Indirect Responsibilities
Answer: A,B,E
Explanation: A: Oracle HTML-based applications use columns, rows and values in database tables to define what information users can access. Table columns represent attributes that can be assigned to a responsibility as Securing Attributes or Excluded Attributes. These attributes are defined in the Web Application Dictionary. Securing Attributes Use the List of Values to select valid attributes. You can assign any number of securing attributes to the responsibility. C: As System Administrator, you define Oracle E-Business Suite users, and assign one or more responsibilities to each user. Direct responsibilities are responsibilities assigned to the user directly. D: Indirect responsibilities are used with Oracle User Management only. A user may "inherit" an indirect responsibility through membership of a group to which the responsibility has been assigned.
