NEW QUESTION: 3 Your company has a standard power scheme for the sales team. You are replacing a laptop for a sales associate. You import the power scheme onto the new laptop. You need to apply the power scheme. What should you do? **A.** Modify the power scheme under Power and Sleep settings. **B.** Modify the advanced power settings. **C.** Run the powercfg /S command. **D.** Run the gpupdate /F command. **Answer: C**
Explanation: Explanation/Reference: Explanation: You can use the powercfg.exe tool to control power schemes (also named power plans) to use the available sleep states, to control the power states of individual devices, and to analyze the system for common energy-efficiency and battery-life problems. The powercfg /SETACTIVE or powercfg /S commands make the specified power scheme active on the system. Note: To Import a Power Plan 1. Open an elevated command prompt. 2. Type the command below into the command prompt, and press Enter to export the power plan. powercfg -import "Full path of .pow file" Note: Substitute Full path of .pow file in the command above with the actual full path of the .pow file of the power plan you exported. 3. When finished, you can close the command prompt if you like. 4. Users on the PC will now be able to select the imported power plan as their active power plan References:
