**NEW QUESTION: 1** To what does "message repudiation" refer to what concept in the realm of email security?  
**A.** Message repudiation means a recipient can be sure that a message was sent from a certain host.  
**B.** Message repudiation means a sender can claim they did not actually send a particular message.  
**C.** Message repudiation means a user can claim damages for a mail message that damaged their reputation.  
**D.** Message repudiation means a recipient can be sure that a message was sent from a particular person.  
**E.** Message repudiation means a user can validate which mail server or servers a message was passed through.  
**Answer: B**  
**Explanation:** A quality that prevents a third party from being able to prove that a communication between two other parties ever took place. This is a desirable quality if you do not want your communications to be traceable. Non-repudiation is the opposite quality—a third party can prove that a communication between two other parties took place. Non-repudiation is desirable if you want to be able to trace your communications and prove that they occurred.  
Repudiation - Denial of message submission or delivery.
