NEW QUESTION: 1How do you check for new messages for a customer in SAP Solution Manager Service Desk?**A.** Call the transaction SE80.**B.** Only the support coordinator can check for new messages.**C.** Call transaction CRMD_ORDER.**D.** This is not possible until the message is assigned.**Answer: C**

NEW QUESTION: 2You are working on a JSP that is intended to inform users about critical errors in the system. The JSP code is attempting to access the exception that represents the cause of the problem, but your IDE is telling you that the variable does not exist. What should you do to address this problem?**A.** Add a <jsp:useBean tag to declare the and access the exception>**B.** Add scriptlet code to create a variable that refer to the exception**C.** Add a page directive stating that this page is an error handler**D.** Perform the error handling in a servlet rather than in the JSPE. Edit the page that caused the error to ensure that it specifies this page as its error handler**Answer: C****Explanation:**Exception is a JSP implicit variableThe exception variable contains any Exception thrown on the previous JSP page with anerrorPage directive that forwards to a page with an isErrorPage directive.Example:If you had a JSP (index.jsp) which throws an exception (I have deliberately thrown aNumberFormatException by parsing a String, obviously you wouldn't write a page that does this,its just an example)<%@ page errorPage="error.jsp" %><% Integer.parseInt("foo"); //throws an exception %>This will forward to error.jsp,If error.jsp was<%@ page isErrorPage = "true"%><body><h2>Your application has generated an error</h2><h3>Please check for the error given below</h3>Exception:
<%= exception.toString() %></body>Because it has the<%@ page isErrorPage = "true"%>page directive, the implicit variable exception will contain the Exception thrown in the previous jspSo when you request index.jsp, the Exception will be thrown, and forwarded to error.jsp which willoutput html like this<body><h2>Your application has generated an error</h2><h3>Please check for the error given below</h3>Exception:
java.lang.NumberFormatException: For input string: "foo"</body>As @JB Nizet mentions exception is an instanceof Throwable calling exception.getMessage() Forinput string: "foo" instead of java.lang.NumberFormatException: For input string: "foo"
