It is also possible that none of the solutions solve the problem.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique

solution. Determine whether the solution meets the stated goals. You need to meet the vendor notification requirement. Solution: Create and apply a custom outbound Azure API Management policy. Does the solution meet the goal? **A. Yes** **B. No** **Answer: A** Explanation: Explanation/Reference: Explanation: Scenario: If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor. (API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.) In Azure API Management (APIM), policies are a powerful capability of the system that allow the publisher to change the behavior of the API through configuration. Policies are a collection of Statements that are executed sequentially on the request or response of an API. Popular Statements include format conversion from XML to JSON and call rate limiting to restrict the amount of incoming calls from a developer. Many more policies are available out of the box.
