NEW QUESTION: 3Which of the following would be the most suitable investment for a client who has retired and needs some current income to augment her social security check?**A.** growth fund**B.** variable life policy**C.** money market fund**D.** U.S. government bond fund**Answer: D**
DExplanation:Explanation/Reference:Explanation: Of the choices provided, the most suitable investment for a client who has retired and needs some current income to augment her social security check would be a U.S. government bond fund. The growth fund is mostly invested in stocks that provide their return in the form of capital appreciation, not dividend income. The variable life policy would not offer her the current income she needs and may even have a surrender charge. Furthermore, these policies are insurance, not investments. A money market fund is good for capital preservation and some of her funds should be invested in a money market fund to meet this objective, but it will not provide her with current income. A U.S. government bond fund is less risky than other bond funds--although its value will fluctuate with interest rate changes--and will provide her with the supplemental income she requires.
