Our simulation function makes our candidates feel the atmosphere of Amazon AI1-C01 exam prep and be familiar with the exam type before the real test, 24/7 customer assisting support you.

**NEW QUESTION: 1**You are an information systems security officer at a mid-sized business and are called upon to investigate a threat conveyed in an email from one employee to another. You gather the evidence from both the email server transaction logs and from the computers of the two individuals involved in the incident and prepare an executive summary. You find that a threat was sent from one user to the other in a digitally signed email. The sender of the threat says he didn't send the email in question. What concept of PKI - Public Key Infrastructure will implicate the sender?**A.** The digital signature of the recipient**B.** Integrity**C.** Non-repudiation**D.** Authentication**Answer: C****Explanation:**Explanation/Reference:Explanation:Non-Repudiation makes sure that a sender is unable to deny sending a message. Incorrect Answers:B: A digital signature guarantees the authenticity and integrity of a message by making use of hashing algorithms and asymmetric algorithms. It will not implicate the sender.C: Authentication refers to the verification of the identity of a user who is requesting the use of a system and/or access to network resources.D: Integrity is upheld by providing assurance of the accuracy and reliability of information and systems and preventing any unauthorized modification. References:Harris, Shon, All In One CISSP Exam Guide, 6th Edition, McGraw-Hill, 2013, pp. 23, 162, 398, 833

**NEW QUESTION: 2**You are developing an application by using C#. You have the following requirements:Support 32-bit and 64-bit system configurations.Include pre-processor directives that are specific to the system configuration.Deploy an application version that includes both system configurations to testers.Ensure that stack traces include accurate line numbers.You need to configure the project to avoid changing individual configuration settings every time you deploy the application to testers. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)**A.** Create two application configurations based on the default Debug configuration.**B.** Create two application configurations based on the default Release configuration.**C.** Optimize the application through address rebasing in the

64-bit configuration.**D.** Update the platform target and conditional compilation symbols for each application configuration.**Answer: A,B**

**NEW QUESTION: 3**One way in which health plans differ from traditional indemnity plans is that health plans typically**A.** contain cost-sharing requirements that result in more out-of-pocket spending by members than do the cost-sharing requirements in traditional indemnity plans**B.** place a greater emphasis on preventive care than do traditional indemnity plans**C.** require members to pay a percentage of the cost of medical services rendered after a claim is filed, rather than a fixed copayment at the time of service as required by indemnity plans**D.** provide less extensive benefits than those provided under traditional indemnity plans**Answer: B**
