NEW QUESTION: 1 A male client has burns over 90% of his body after an automobile accident resulting in a fire. He was trapped inside the auto and pulled out by a bystander. After several months in the hospital and over 20 surgeries, discharge planning has begun. Throughout his hospitalization the nursing staff has been aware of psychological changes the client faces after burns over a large portion of his body resulting in disfigurement. The nursing staff can best foster the client's self-esteem by:
A. Allowing him to plan, assist in, and perform his own care whenever possible
B. Adhering to a strict schedule of diet, exercise, and wound care
C. Following a standardized plan of care for burn clients formulated by a world-renowned burn center
D. Allowing him to go to physical therapy for whirlpool treatment when other clients were not in physical therapy
Answer: A
Explanation: Explanation/Reference: Explanation: (A) A regimented schedule, allowing no flexibility, will not foster the client's self-esteem. (B) Isolating the client may only enhance his feelings of social isolation due to his disfigurement. (C) Standardized care plans must be personalized and adapted to each client's situation. (D) Allowing the client control over his care will foster his self-esteem and prepare him for life outside of the hospital.

NEW QUESTION: 2 Users are utilizing thumb drives to connect to USB ports on company workstations. A technician is concerned that sensitive files can be copied to the USB drives. Which of the following mitigation techniques would address this concern? (Select TWO).
A. Disable USB within the workstations BIOS.
B. Run spyware detection against all workstations.
C. Disable the USB root hub within the OS.
D. Apply the concept of least privilege to USB devices.
E. Install anti-virus software on the USB drives.
Answer: A, C
Explanation: A. The USB root hub can be disabled from within the operating system. C. USB can also be configured and disabled in the system BIOS. Incorrect Answers: B. Anti-virus is installed on a device, not on removable storage. Anti-virus also does not prevent the unauthorized copying of data. D. The principle of least privilege is used to ensure that users are only provided with the minimum privileges and permissions to resources that allow them to perform their duties. E. Spyware monitors a user's activity and uses network protocols to reports it to a third party without the user's knowledge. Detecting spyware does not prevent the unauthorized copying of data.
