NEW QUESTION: 2Which two statements describe the Cisco TrustSec system correctly? (Choose two.)**A.** The Cisco TrustSec system tests and certifies all products and product versions that make up the system as working together in a validated manner.**B.** The Cisco TrustSec system is an approach to certifying multimedia and collaboration applications as secure.**C.** The Cisco TrustSec system is an Advanced Network Access Control System that leverages enforcement intelligence in the network infrastructure.**D.** The Cisco TrustSec system is a partner program, where Cisco certifies third-party security products as extensions to the secure infrastructure.**Answer: A,C**

NEW QUESTION: 3Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.You need to deploy a new Microsoft SQL Server environment that meets the following requirements:* The SQL Server instance must be highly available.* There must be minimal downtime incurred during hardware failure or operating system maintenance.* All instance-level security settings and SQL Server Agent jobs must be available without additional synchronization tasks.What should you implement?**A.** a file share witness**B.** a Microsoft SQL Server failover cluster instance (FCI)**C.** log shipping**D.** a Microsoft Azure Stretch Database**E.** a Windows cluster with a shared-nothing architecture**F.** an Always On Availability Group with secondary replicas in asynchronous-commit mode**G.** an Always On Availability Group with all replicas in synchronous-commit mode**Answer: B**
Explanation:As part of the SQL Server Always On offering, Always On Failover Cluster Instances leverages Windows Server Failover Clustering (WSFC) functionality to provide local high availability through redundancy at the server-instance level-a failover cluster instance (FCI). An FCI is a single instance of SQL Server that is installed across Windows Server Failover Clustering (WSFC) nodes and, possibly, across multiple subnets.When there is hardware or software failure of a server, the applications or clients connecting to the server will experience downtime. When a SQL Server instance is configured to be an FCI (instead of a standalone

instance), the high availability of that SQL Server instance is protected by the presence of redundant nodes in the FCI. References:
