**Answer: B**

**NEW QUESTION: 2** Refer to the exhibit. An administrator supports a RAP at a branch office shown in the exhibit. The company has one Mobility Controller (MC) at the Primary DMZ site and one at the Secondary DMZ site. The RAP is configured to connect to only the MC at the Primary DMZ site. A network outage with the ISP at the Primary DMX site causes the RAP to reboot. Upon reboot, the RAP cannot build a tunnel to the Secondary DMZ site MC because the administrator forgot to add the Second LMS IP address to the AP Group configuration. Once the RAP can successfully connect, the administrator can add the Secondary DMZ MC as a backup LMS to fix the AP Group. What should the administrator implement to allow the RAP to connect to the MC at the Secondary DMZ site while the outage at the primary site persists? **A.** Dynamic discovery through multicast ADP **B.** Dynamic discovery through DHCP Option 60 **C.** Static configuration from apboot mode **D.** Dynamic discovery through DHCP Option 43 **Answer: D**

**NEW QUESTION: 3** Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time. When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the

outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. You may now click next to proceed to the lab.

Lab information Use the following login credentials as needed: To enter your username, place your cursor in the Sign in box and click on the username below. To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: [email&#160;protected] Microsoft 365 Password: x?-ofP?fG70olf

Lab Instance: 11325860 You need to ensure that an external user named [email&#160;protected] can register an application in your Microsoft 365 tenant. The solution must use the principle of least privilege. To answer, sign in to the Microsoft 365 portal.

**Answer:** Explanation: You need to create a guest account for the external user and assign the Application Developer role. As the user's domain is an external domain, you will need to 'invite' the user. The external user will need to accept the invitation to create the account.

1. Go to the Azure Active Directory Admin Center.
2. In the left navigation pane, select Users.
3. Click on the '+ New Guest User' link.
4. Ensure that the 'Invite user' option is selected.
5. Enter [email&#160;protected] in the email address field.
6. In the Roles section, 'user' will be selected by default. Click on 'user' to open a list of roles.
7. Select Application Developer in the list and click the 'Select' button to assign the role.
8. Click the 'Invite' button to send the invitation.
