Our in-house software team has made each process fast, HPE7-A03 Valid Test Fee making the download process easier, If you have no choice, do the best, PDF version of HPE7-A03 practice questions - it is legible to read and HPE7-A03 Exam Objectives Pdf remember, and support customers' printing request, so you can have a print and practice in papers.

Actually, most people do not like learning the boring knowledge.

**NEW QUESTION: 1** A customer is deploying a new application and needs to choose an AWS Region. Which of the following factors could influence the customer's decision? (Select TWO.)**A.** Proximity to the customer's office for on-site visits**B.** Data sovereignty compliance**C.** Reduced latency to users**D.** The application's presentation in the local language**E.** Cooling costs in hotter climates**Answer: B,C**

**NEW QUESTION: 2** View the Exhibit to see the information taken from the installation log file. Based on the information presented in the Exhibit, which two options describe the state of the system when the server is booted for the first time after the installation is complete?**A.** The network/physical service is offline.**B.** You cannot log in from the console as root. You must first log in as a user and then su to root account.**C.** The root user can log in from the console login.**D.** NWAM will be used to configure the network interface.**E.** You will be prompted to configure the network interface after the initial login.**Answer: A,C**

**NEW QUESTION: 3** Given the following state table: Which of the following represents an INVALID transition (N)?**A.** Channel 2 from Live?**B.** Stby from Live?**C.** Off from isplay Channel 1?**D.** Channel 2 from Display Channel 1?**Answer: C**

### NEW QUESTION: 4

会社が従業員が会社のディレクトリIDを使用して管理コンソールにログインできるように、シングルサインオン (SSO) を有効にしたいと考えています。プロセスの一部として、以下のどのステップが必要ですか？以下のオプションから2つ選択してください。選んでください：**A.** オンプレミスネットワークとAWSの間にダイレクトコネクタ接続を作成します。**B.** AWSをオンプレミスのActive Directoryに接続するには、ADコネクタを使用します。**C.** IAMと企業ディレクトリIDプロバイダー (IdP) の間の信頼関係を確立するIAMロールを作成します。**D.** ユーザーに提供された一時的なセキュリティトークンにIAMロールを割り当てるLambda関数を作成します。**E.** 社内ディレクトリのグループメンバーシップにマップできるIAMポリシーを作成します。

従業員の企業IDにマップできるIAMユーザーを作成します **Answer: A,B** Explanation: Create a Direct Connect connection so that corporate users can access the AWS account Option B is incorrect because IAM policies are not directly mapped to group memberships in the corporate directory. It is IAM roles which are mapped. Option C is incorrect because Lambda functions is an incorrect option to assign roles. Option D is incorrect because IAM users are not directly mapped to employees' corporate identities. For more information on Direct Connect, please refer to below URL: <https://aws.amazon.com/directconnect/> From the AWS Documentation, for federated access, you also need to ensure the right policy permissions are in place Configure permissions in AWS for your federated users The next step is to create an IAM role that establishes a trust relationship between IAM and your organization's IdP that identifies your IdP as a principal (trusted entity) for purposes of federation. The role also defines what users authenticated your organization's IdP are allowed to do in AWS. You can use the IAM console to create this role. When you create the trust policy that indicates who can assume the role, you specify the SAML provider that you created earlier in IAM along with one or more SAML attributes that a user must match to be allowed to assume the role. For example, you can specify that only users whose SAML eduPersonOrgDN value is ExampleOrg are allowed to sign in. The role wizard automatically adds a condition to test the saml:aud attribute to make sure that the role is assumed only for sign-in to the AWS Management Console. The trust policy for the role might look like this: For more information on SAML federation, please refer to below URL: [https://docs.aws.amazon.com/IAM/latest/UserGuide/id\\_roles\\_providers\\_enable](https://docs.aws.amazon.com/IAM/latest/UserGuide/id_roles_providers_enable) Note: What directories can I use with AWS SSO? You can connect AWS SSO to Microsoft Active Directory, running either on-premises or in the AWS Cloud. AWS SSO supports AWS Directory Service for Microsoft Active Directory, also known as AWS Managed Microsoft AD, and AD Connector. AWS SSO does not support Simple AD. See AWS Directory Service Getting Started to learn more. To connect to your on-premises directory with AD Connector, you need the following: VPC Set up a VPC with the following: \* At least two subnets. Each of the subnets must be in a different Availability Zone. \* The VPC must be connected to your on-premises network through a virtual private network (VPN) connection or AWS Direct Connect. \* The VPC must have default hardware tenancy. \* <https://aws.amazon.com/single-sign-on/> <https://aws.amazon.com/single-sign-on/faqs/> <https://aws.amazon.com/blog/using-corporate-credentials/> <https://docs.aws.amazon.com/directoryservice/latest/admin-> The correct answers are: Create a Direct Connect connection between on-premise network and AWS. Use an AD connector connecting AWS with on-premise active directory.. Create an IAM role that establishes a trust relationship between IAM and corporate directory identity provider (IdP) Submit your Feedback/Queries to our Experts
