NEW QUESTION: 1HOTSPOTYour network contains an Active Directory domain named contoso.com. The domain contains four servers. These servers are configured as shown in the following table. You plan to provide users with the ability to use Workplace Join for their personal device when they connect to the internal network. You need to recommend a certificate configuration for the planned deployment. What should you include in the recommendation? To answer, select the appropriate names in the answer area.**Answer:** Explanation: Box 1, Box 2: Server3.contoso.com Workplace Join client devices will attempt to discover the Device Registration Server by combining the user account name with a well-known Device Registration server name. This would be the AD FS server name, which is Server3.contoso.com here. Note: For the Workplace Join client to discover the Device Registration server using a well-known DNS CNAME record, AD FS must be configured with a server SSL certificate that includes the well-known Device Registration server names Box 3: Enterpriseregistration.contoso.com You must create a DNS CNAME record that points to the A record associated with your AD FS farm. The CNAME record must use the well-known prefix EnterpriseRegistration followed by the UPN suffix used by the user accounts at your organization. NEW QUESTION: 2 Refer to the screenshot below: Which of the following statements is correct regarding the above configuration for the private key? (Choose 2) **A.** More bits in the private key will reduce security, hence smallest private key size is used. **B.** The private key is stored in the user device. **C.** More bits in the private key will increase the processing time, hence smallest private key size is used. **D.** The private key is stored in the ClearPass server. **E.** The private key for TLS client certificates is not created. **Answer: B,C**

NEW QUESTION: 3 A nursing unit supervisor notes that there is a high rate of absenteeism and minimal participation by staff nurses. Which of the following leadership styles is the supervisor most likely using in this situation? **A.** Laissez-faire **B.** Democratic **C.** Progressive **D.** Authoritarian **Answer: D** Explanation: A leadership style that the supervisor would most likely use in this situation is authoritarian. When the leadership style is authoritarian, the group may demonstrate passive-aggressive behavior, such as absenteeism and minimal participation.

NEW QUESTION: 4 You are building a mobile app for consumers to post cat pictures online. You will be storing the images in AWS S3. You want to run the system very cheaply and simply. Which one of these options allows you to build a photo sharing application without needing to

worry about scaling expensive uploads processes, authentication/authorization and so forth? **A.** Build the application out using AWS Cognito and web identity federation to allow users to log in using Facebook or Google Accounts. Once they are logged in, the secret token passed to that user is used to directly access resources on AWS, like AWS S3. **B.** Use JWT or SAML compliant systems to build authorization policies. Users log in with a username and password, and are given a token they can use indefinitely to make calls against the photo infrastructure. **C.** Create an AWS OAuth Service Domain and grant public signup and access to the domain. During setup, add at least one major social media site as a trusted Identity Provider for users. **D.** Use AWS API Gateway with a constantly rotating API Key to allow access from the client-side. Construct a custom build of the SDK and include S3 access in it. **Answer: A** Explanation: The short answer is that Amazon Cognito is a superset of the functionality provided by web identity federation. It supports the same providers, and you configure your app and authenticate with those providers in the same way. But Amazon Cognito includes a variety of additional features. For example, it enables your users to start using the app as a guest user and later sign in using one of the supported identity providers.
