We invited a group of professional experts dedicated to design the most effective and accurate JN0-281 questions and answers for you, At Photoexperienceacademy.com, we have a completely customer oriented policy.

Most people live a common life and have no special achievements.

NEW QUESTION: 1 Wählen Sie für jede der folgenden Aussagen Ja aus, wenn die Aussage wahr ist. Andernfalls wählen Sie Nein. HINWEIS: Jede richtige Auswahl ist einen Punkt wert.**Answer:**
Explanation:

NEW QUESTION: 2 According to Google, there are three primary benefits of YouTube for users and marketers. Which one of the following is NOT one the primary benefits for users of YouTube as stated by Google?**A.** Online presence to sell items in an auction-style format using Google Checkout**B.** Opportunity to participate on multiple platforms, allowing portability of content**C.** Ability to engage with a massive community that is already interacting with the content**D.** Access to the largest inventory of professional and user-generated videos in the world**Answer:**
A

NEW QUESTION: 3 Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. Server1 runs Windows Server 2012. You need to create 3-TB virtual hard disk (VHD) on Server1. Which tool should you use?**A.** Diskpart**B.** New-VirtualDisk**C.** New-StoragePool**D.** Server Manager**Answer: A**
Explanation: New-VirtualDisk - Creates a new virtual disk in the specified storage pool. Although the new Server Manager UI in Windows Server 2012 provides a very convenient and intuitive workflow to provision and manage Storage, interaction with PowerShell is required to access many of the advanced features. If I then create a simple 200GB Virtual Disk via the UI named VDiskSimpleUI, the resulting Virtual Disk leverages 8 columns and maintains 1 copy of the data. But when creating the Virtual Disk via PowerShell, I can force the tripping across all nine of the disks and optimize performance. New-VirtualDisk -StoragePoolFriendlyName Pool01 -ResiliencySettingName Simple -Size 200GB -FriendlyName VDiskSimplePS -ProvisioningType Fixed -NumberOfDataCopies 1 -NumberOfColumns 9 And creating a mirrored 200GB Virtual Disk via the UI named VDiskMirrorUI produces a Virtual Disk with 4 columns and 2 data copies. But with PowerShell, I can create a slightly different configuration, increasing the data protection (and

also the disk footprint):New-VirtualDisk -StoragePoolFriendlyName Pool01
-ResiliencySettingName Mirror -Size 200GB -FriendlyName VDiskMirrorPS -ProvisioningType
Fixed -NumberOfDataCopies 3 -NumberOfColumns 3
