**NEW QUESTION: 1** You have a computer that runs Windows 7. The computer is configured to automatically download and install updates. You install Microsoft Office 2007. You need to ensure that service packs for Office are automatically installed. What should you do? **A.** Download and install the Office 2007 administrative template and disable the Block updates from the Office Update Site from applying policy. **B.** Create a folder named Updates in C:\Program Files\Microsoft Office. Install the Office Update Inventory Tool into the Updates folder. **C.** From Windows Update, select Restore hidden updates. **D.** From Windows Update, select Get updates for other Microsoft products. **Answer: D** **Explanation:** Use Windows Update to Check for Updates to other Microsoft Products. By default, Windows Update can download and install updates for Windows 7 and features that are part of the operating system (such as Internet Explorer). You can also merge the functionality - a service for managing updates to Microsoft Office and several other of Microsoft Update - into Windows Update so that you no longer need to visit Office Online to get Microsoft products updates. If you do not already have Windows Update integrated with Microsoft Update, you will see Get updates for other Microsoft products on the Windows Update home page. To the message enable checking for other products, click the Find Out More option shown beside this message. This will take you to the Microsoft Update site for some quick installation steps. You only need to do this once. Thereafter, the Windows Update home page will indicate that you receive updates For Windows and other products from Microsoft Update.

**NEW QUESTION: 3** Satish Dhawan, a veteran fixed income trader is conducting interviews for

the post of a junior fixed income trader. He interviewed four candidates Adam, Balkrishnan, Catherine and Deepak and following are the answers to his questions. Question 1: Tell something about Option Adjusted Spread Adam: OAS is applicable only to bond which do not have any options attached to it. It is for the plain bonds. Balkrishna: In bonds with embedded options, AS reflects not only the credit risk but also reflects prepayment risk over and above the benchmark. Catherine: Since spreads are calculated to know the level of credit risk in the bond, OAS is difference between in the Z spread and price of a call option for a callable bond. Deepak: For callable bond OAS will be lower than Z Spread. Question 2: This is a spread that must be added to the benchmark zero rate curve in a parallel shift so that the sum of the risky bond's discounted cash flows equals its current market price. Which Spread I am talking about? Adam: Z Spread Balkrishna: Nominal Spread Catherine: Option Adjusted Spread Deepak: Asset Swap Spread Question 3: What do you know about Interpolated spread and yield spread? Adam: Yield spread is the difference between the YTM of a risky bond and the YTM of an on-the-run treasury benchmark bond whose maturity is closest, but not identical to that of risky bond. Interpolated spread is the spread between the YTM of risky bond and the YTM of same maturity treasury benchmark, which is interpolated from the two nearest on-the-run treasury securities. Balkrishna: Interpolated spread is preferred to yield spread because the latter has the maturity mismatch, which leads to error if the yield curve is not flat and the benchmark security changes over time, leading to inconsistency. Catherine: Interpolated spread takes account the shape of the benchmark yield curve and therefore better than yield spread. Deepak: Both Interpolated Spread and Yield Spread rely on YTM which suffers from drawbacks and inconsistencies such as the assumption of flat yield curve and reinvestment at YTM itself. Then Satish gave following information related to the benchmark YTM's: Who amongst the four candidates is correct regarding OAS? **A. Only Deepak B. Only Catherine C. Only Adam and Catherine D. Only Deepak and Catherine** **Answer: C**

**NEW QUESTION: 4** Which two methods can be used to assign a participant in a User task at design time? (Choose two.) **A. Using a participant expression B. Using a performer data field or parameter C. Using an LDAP reference D. Selecting an Organization Model entity** **Answer: C,D**
