NEW QUESTION: 1The range of virtual addresses that z/OS can assign to a user or separately running program is called a(n)_____ space.**A. AddressB. MappingC. VirtualD. Physical**
Answer: A

NEW QUESTION: 2Note This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You need to assign User2 the required roles to meet the security requirements.Solution: From the Office 365 admin center, you assign User2 the Security Administrator role. From the Exchange admin center, you add User2 to the View Management role.Does this meet the goal?**A. NOB. YesAnswer: B**
Explanation:Topic 2, Case Study 2Overview:Existing Environment:Active Directory Environment:The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user account and computer accounts.All users authenticate to on-premises applications by signing in to their device by using a UPN format of [email#160;protected] Fabrikam does NOT plan to implement identity federation.Network infrastructureEach office has a high-speed connection to the internet.Each office contains two domain controllers. All domain controllers are configured as a DNS server.All users connect to an on-premises Microsoft Exchange server 2016 organization. The users access their email by using Outlook Anywhere. Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.All shared company documents are stored on a Microsoft SharePoint server farm. Requirements:Planned Changes:Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared document to the subscription.Fabrikam plans to implement two pilot projects.* Project1: During Project 1, the mailbox of 100 users in the sales department will be moved in Microsoft 365.* Project2: After the successful completion of Project1, Microsoft Teams & Skype for business will be enable in Microsoft 365 for the sales departments users.Fabrikam plans to create a group named User Licenses that will manage the allocation of all Microsoft 365 buy Licenses.Technical Requirements:Fabrikam identifies the following technical requirements:* All users must be able to exchange email messages

successfully during project1 by using their current email.* Users must be able to authenticate to cloud services if Active Directory becomes unavailable.* A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.* Microsoft Office 365 ProPlus applications must be installed from a network share only.* Disruption to email access must be minimized.Application Requirements:Fabrikam identifies the following application requirements:* An On-Premises web application named App1 must allow users to complete their expense reports online.* The installation of feature updates for Office 365 ProPlus must be minimized.Security Requirements:Fabrikam identifies the following security requirements:* After the planned migration to Microsoft 365 all users must continue to authenticate to their mailbox and to sharepoint sites by using their UPN.* The memberships of UserLicense must be validated monthly. Unused user accounts must be removed from the group automatically.* The Principle of least privilege must be used.

NEW QUESTION: 3Which NetScaler mode is commonly referred to as 'inline mode' ?**A.** Two-Arm Mode**B.** MAC-based Forwarding**C.** One-Arm Mode**D.** Use Source IP (USIP)**Answer: A**
Explanation:Section: (none)
