NEW QUESTION: 1A. Option AB. Option DC. Option ED. Option CE. Option B Answer: A,B,E
Explanation:SNMP is an application-layer protocol that provides a message format for communication between SNMP managers and agents. SNMP provides a standardized framework and a common language used for the monitoring and management of devices in a network.The SNMP framework has three parts:+ An SNMP manager+ An SNMP agent+ A Management Information Base (MIB)The SNMP manager is the system used to control and monitor the activities of network hosts using SNMP. The most common managing system is called a Network Management System (NMS). The term NMS can be applied to either a dedicated device used for network management, or the applications used on such a device. A variety of network management applications are available for use with SNMP. These features range from simple command-line applications to feature-rich graphical user interfaces (such as the Cisco Works 2000 line of products).The SNMP agent is the software component within the

managed device that maintains the data for the device and reports these data, as needed, to managing systems. The agent and MIB reside on the routing device (router, access server, or switch). To enable the SNMP agent on a Cisco routing device, you must define the relationship between the manager and the agent. The Management Information Base (MIB) is a virtual information storage area for network management information, which consists of collections of managed objects.

NEW QUESTION: 2 HOTSPOT You work as a graphic designer for WEBDESIGN Inc. You are using a transition on a video in Photoshop CS6. You want to fade the first clip out as the second clip fades in. Choose the option to accomplish the task. **Answer:** Explanation:
