**NEW QUESTION: 1**For each of the given items, select the appropriate authentication category from the drop down choices.Select the appropriate authentication type for the following items:

**Answer:** Explanation:Explanation

**NEW QUESTION: 2**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You are a Dynamics 365 for Customer Service system administrator for Contoso, Ltd.You need to automatically create cases from emails sent to the [\[email#160;protected\]](#) email address.Solution: Configure Dynamics 365 to automatically send responses to customers when the record is created.Does the solution meet the goal?**A. YesB. NoAnswer: B**

**NEW QUESTION: 3**An organization is planning to host an application on the AWS VPC. The organization wants dedicated instances. However, an AWS consultant advised the organization not to use dedicated instances with VPC as the design has a few limitations. Which of the below mentioned statements is not a limitation of dedicated instances with VPC?**A. The user cannot use Reserved Instances with a dedicated tenancy model.B. The EBS volume will not be on the same tenant hardware as the EC2 instance though the user has configured dedicated tenancy. C. It does not support the AWS RDS with a dedicated tenancy VPC.D. All instances launched with this VPC will always be dedicated instances and the user cannot use a default tenancy model for them.****Answer: A**Explanation:The Amazon Virtual Private Cloud (Amazon VPC) allows the user to define a virtual networking environment in a private, isolated section of the Amazon Web Services (AWS) cloud. The user has complete control over the virtual networking environment. Dedicated instances are Amazon EC2 instances that run in a Virtual Private Cloud (VPC) on hardware that is dedicated to a single customer. The client's dedicated instances are physically isolated at the host hardware level from instances that are not dedicated instances as well as from instances that belong to other AWS accounts. All instances launched with the dedicated tenancy model of VPC will always be dedicated instances. Dedicated tenancy has a limitation that it may not support a few services, such as RDS. Even the EBS will not be on dedicated hardware. However the user can save some cost as well as reserve some capacity by using a Reserved Instance model with dedicated tenancy.
