NEW QUESTION: 3 Refer to the exhibit. The output is from a router in a large enterprise. From the output, determine the role of the router.
A. Remote stub router at a remote site.
B. A Core router.
C. The HQ Internet gateway router.
D. The WAN router at the central site.
Answer: A
Explanation: Since the routing table shows only a single default route using the single interface serial0/0, we know that this is most likely a remote stub site with a single connection to the rest of the network. All the other answer options would mean that this router would have more connections, and would contain more routes.
