You need to create five functioning VMs from an existing VM. What should you do? **A.** Export the VM, copy the files onto five different host servers, import the VMs on the host servers, and then power on the VMs. **B.** Create five snapshots and export the VM. Import the VM one time and duplicate the files to five different host servers. **C.** Copy the .VHD file and the VM configuration file to the five different host servers and then power on the VMs. **D.** Copy the .VHD to five different host servers and then power on the VMs. **Answer: A** Explanation: Export VM first.

NEW QUESTION: 2 You administer a Microsoft SQL Server database. Service accounts for SQL Agent are configured to use a local user. A Microsoft SQL Server Integration Services (SSIS) job step has been created within a SQL Server Agent job. The SSIS package accesses a network share when exporting data from a SQL Server database. When you execute the SQL Server Agent job, it fails due to a permissions failure on a share on a remote server. You need to ensure that the SQL Server Agent job can execute the SSIS package. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.) **Answer:** Explanation: SQL Server Agent allows creating a proxy account which defines the security context for the job step. We need to do is to create a credential to be used by the proxy account. The created proxy needs to have access to the SSIS subsystem. References:
