NEW QUESTION: 2 A hospital has a relational data warehouse, a SQL Server Analysis Services (SSAS) database, and a SQL Server Reporting Services (SSRS) instance. The SSAS database contains a cube named Pharmacy. Shared data sources exist in SSRS for the relational and SSAS databases. Each hospital department has its own report writers. Report writers in the Human Resources (HR) department want to create new reports by using Report Builder. Many reports will include data generated by a custom formula that references data stored either in a data warehouse table or in the Pharmacy cube. The custom formula will compare time periods across multiple products, categories, and employees. You have the following requirements: Ensure that only the HR department report writers can access the custom formula. Implement only one dataset. Ensure that the dataset references the data source that will provide the fastest data retrieval. You need to meet the requirements to support the HR department report writers. What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.) --- **A.** Create, deploy, and secure a shared dataset that references the SSAS database shared data source and includes a calculated member for the custom formula. **B.** Create, deploy, and secure a shared dataset that references the data warehouse shared data source and includes custom Transact-SQL (T-SQL) code for the custom formula. **C.** Create a calculated member in the Pharmacy cube.
