**Explanation:**  
Explanation/Reference: Explanation: A threat is any potential danger that is associated with the exploitation of a vulnerability. The threat is that someone, or something, will identify a specific vulnerability and use it against the company or individual. The entity that takes advantage of a vulnerability is referred to as a threat agent. A threat agent could be an intruder accessing the network through a port on the firewall, a process accessing data in a way that violates the security policy, a tornado wiping out a facility, or an employee making an unintentional mistake that could expose confidential information. Incorrect Answers: A: A risk is the likelihood of a threat agent exploiting a vulnerability and the corresponding business impact. C: A vulnerability is the absence or weakness of a safeguard that could be exploited. D: A weakness is the state of something being weak. For example, a weak security measure would be a vulnerability. A weakness is not what is described in this question.
