C. The log keyword can be uned but the log-input keyword munt not be uned in policing. D. Control plane policing will affect only traffic that in dentined to the route procennor.
Answer: B,D

NEW QUESTION: 3You have a protect in Azure DevOps. You need to associate an automated test to a test case. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Answer: Explanation: Explanation The process to associate an automated test with a test case is:
* Create a test project containing your automated test. What types of tests are supported?
* Check your test project into an Azure DevOps or Team Foundation Server (TFS) repository.
* Create a build pipeline for your project, ensuring that it contains the automated test. What are the differences if I am still using a XAML build?
* Use Visual Studio Enterprise or Professional 2017 or a later version to associate the automated test with a test case as shown below. The test case must have been added to a test plan that uses the build you just defined.
