the Remote Desktop client and remote host must meet the following requirements:
The Remote Desktop client device: Must be running at least Windows 10, version 1703 to be able to supply credentials. Must be running at least Windows 10, version 1607 or Windows Server 2016 to use the user's signed-in credentials. This requires the user's account be able to sign in to both the client device and the remote host. Must be running the Remote Desktop Classic Windows application. The Remote Desktop remote host: Must be running at least Windows 10, version 1607 or Windows Server 2016. Must allow Restricted Admin connections. Must allow the client's domain user to access Remote Desktop connections. Must allow delegation of non-exportable credentials.
