NEW QUESTION: 3 You have an Azure subscription that contains an Azure Directory (Azure AD) tenant named contoso.com. The tenant is synced to the on-premises Active Directory domain. The domain contains the users shown in the following table. You enable self-service password reset (SSPR) for all users and configure SSPR to have the following authentication methods: * Number of methods required to reset: 2 * Methods available to users: Mobile phone, Security questions * Number of questions required to register: 3 * Number of questions required to reset: 3 You select the following security questions: * What is your favorite food? * In what city was your first job? * What was the name of your first pet? For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation: Box 1: No Administrator accounts are special accounts with elevated permissions. To secure them, the following restrictions apply to changing passwords of administrators: On-premises enterprise administrators or domain administrators cannot reset their password through Self-service password reset (SSPR). They can only change their

password in their on-premises environment. Thus, we recommend not syncing on-prem AD admin accounts to Azure AD. An administrator cannot use secret Questions & Answers as a method to reset password. Box 2: Yes Self-service password reset (SSPR) is an Azure Active Directory feature that enables employees to reset their passwords without needing to contact IT staff. Box 3: Yes References: <https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-sspr-deployment>
