NEW QUESTION: 1 Which option describes Cisco's virtual device context feature?
A. multiple physical switches partitioned to a single virtual switch
B. logical switches aggregated into a single physical switch
C. logical switches aggregated into multiple physical switches
D. logical virtualization of a single physical switch
Answer: D
Explanation: Explanation/Reference:
Explanation: Cisco NX-OS introduces support for virtual device contexts (VDCs), which allows the switches to be virtualized at the device level. Each configured VDC presents itself as a unique device to connected users within the framework of that physical switch. The VDC runs as a separate logical entity within the switch, maintaining its own unique set of running software processes, having its own configuration, and being managed by a separate administrator.
Reference:
http://www.cisco.com/c/en/us/products/collateral/switches/nexus-7000-10-slot-switch/White_Paper_Tech_Overview_Virtual_Device_Contexts.html

NEW QUESTION: 2 A Customer is creating a new configuration which requires a ratio of 10% reads and 90% writes. The configuration will also need to handle very small I/O sizes. The customer is also concerned about the performance of the new drives. What RAID and drive configuration should be recommended?
A. RAID 5 with SAS Drives
B. RAID 1/0 with SAS Drives
C. RAID 6 with NL-SAS Drives
D. RAID 5 with NL-SAS Drives
Answer: B

NEW QUESTION: 3 Your customer has a large number of legal entities. The legal entity values are defined in the company segment and the primary balancing segment. They want to easily create eliminating entries for their intercompany activity. What should you recommend?
A.

Define an intercompany segment and qualify it as the second balancing segment to make sure all entries are balanced for the primary balancing segment and intercompany segment. **B.** Define an intercompany segment in the chart of accounts. The Intercompany module and the Intercompany balancing feature in general ledger and subledger accounting will automatically populate the intercompany segment with the balancing segment value of the legal entity with which you are trading. **C.** There is no need to define an intercompany segment. You can track the intercompany trading partner using distinct intercompany receivable/payable natural accounts to identify the trading partner. **D.** There is no need to define an intercompany segment, the Intercompany module keeps track of the trading partners for you based on the intercompany rules you define. **Answer: B**
