NEW QUESTION: 1 An application running on EC2 instances processes sensitive information stored on Amazon S3. The information is accessed over the Internet. The security team is concerned that the Internet connectivity to Amazon S3 is a security risk. Which solution will resolve the security concern? Please select: **A.** Access the data through a VPC endpoint for Amazon S3 **B.** Access the data through an Internet Gateway. **C.** Access the data through a VPN connection. **D.** Access the data through a NAT Gateway. **Answer: A** Explanation: Explanation The AWS Documentation mentions the following: A VPC endpoint enables you to privately connect your VPC to supported AWS services and VPC endpoint services powered by PrivateLink without requiring an internet gateway, NAT device, VPN connection, or AWS Direct Connect connection. Instances in your VPC do not require public IP addresses to communicate with resources in the service. Traffic between your VPC and the other service does not leave the Amazon network. Option A, B and C are all invalid because the question specifically mentions that access should not be provided via the Internet. For more information on VPC endpoints, please refer to the below URL: The correct answer is: Access the data through a VPC endpoint for Amazon S3 Submit your Feedback/Queries to our Experts
