Sampling is a feature in Azure Application Insights. It is the recommended way to reduce telemetry traffic and storage, while preserving a statistically correct analysis of application data. The filter selects items that are related, so that you can navigate between items when you are doing diagnostic investigations. When metric counts are presented to you in the portal, they are renormalized to take account of the sampling, to minimize any effect on the statistics. Sampling reduces traffic and data costs, and helps you avoid throttling. References: <https://docs.microsoft.com/en-us/azure/azure-monitor/app/sampling>
