The system we design has strong compatibility, You do not need [Customized FCP_FMG_AD-7.4 Lab Simulation](#) to worry about the new updates, because we will send the follow-up materials

to your mailbox lasting for one year.

C_CPE_16-APP C_CPE_16 Question Bank: Free PDF Download - SAP Certified Associate Dumps, Where else can you find an SAP C_CPE_16 study pack with so many possibilities?

One of our many privileges offering for exam candidates is the update, In addition, our C_CPE_16 learning quiz will be updated according to the newest test syllabus.

About some complicated questions, the professional experts [C_CPE_16](#) we invited provided detailed and understandable explanations below the questions for you reference.

NEW QUESTION: 1What time card criteria can you run with the Mass Submit and Approve Time Card process?**A.** Date Range, Person Name, Group Name, Approver Name, Location, Department**B.** Date Range, Person Name, Person Number, Group Name, and Time Card Status **C.** Date Range, Person Name, Group Name, and Time Card Status**D.** Date Range, Person Name, Person Number, Group Name, and Time Card Status, Approver Name**Answer: C**

NEW QUESTION: 2You network contains an Active Directory domain that is synced to Azure Active Directory (Azure AD) as shown in the following exhibit.You have a user account configured as shown in the following exhibit.For each of the following statements, select Yes if the statement is true. Otherwise, select No.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:Box 1: NoPassword writeback is disabled.Note: Having a cloud-based password reset utility is great but most companies still have an on-premises directory where their users exist. How does Microsoft support keeping traditional on-premises Active Directory (AD) in sync with password changes in the cloud? Password writeback is a feature enabled with Azure AD Connect that allows password changes in the cloud to be written back to an existing on-premises directory in real time.Box 2: NoBox 3: YesYes, there is an Edit link for Location Info.References:
<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-writeback>

NEW QUESTION: 3情報セキュリティ戦略を実施する主な目的は次のうちどれですか？**A.** 情報セキュリティポリシーの順守を維持するため**B.** 業界のベストプラクティスに合わせる**C.** 法的要件へのコンプライアンスを示すため**D.** リスクを許容可能なレベルに管理する**Answer: D**

NEW QUESTION: 4Your network contains an Active Directory domain named adatum.com. The domain contains a member server named Server1 and 10 web servers. All of the web servers are in an organizational unit (OU) named WebServers_OU. All of the servers run Windows Server 2012 R2.On Server1, you need to collect the error events from all of the web servers. The solution must ensure that when new web servers are added to WebServers_OU, their error events are collected automatically on Server1.What should you do?**A.** On Server1, create a source computer initiated subscription. From a Group Policy object (GPO), configure the Configure forwarder resource usage setting.**B.** On Server1, create a collector initiated subscription. From a Group Policy object (GPO), configure the Configure target Subscription Manager setting.**C.** On Server1, create a source computer initiated subscription. From a Group Policy object (GPO), configure the Configure target Subscription Manager setting.**D.** On Server1, create a collector initiated subscription. From a Group Policy object (GPO), configure the Configure forwarder resource usage setting.**Answer: C**Explanation:Explanation/Reference: Explanation:Source-initiated subscriptions allow you to define a subscription on an event collector computer without defining the event source computers, and then multiple remote event source computers can be set up (using a group policy setting) to forward events to the event collector computer. This differs from a collector initiated subscription because in the collector initiated subscription model, the event collector must define all the event sources in

the event subscription. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management: `winrm qc -q`. Start group policy by running the following command: `%SYSTEMROOT%\System32\gpedit.msc`. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node. Right-click the Subscription Manager setting, and select Properties. Enable the Subscription Manager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The Subscription Manager Properties window contains an Explain tab that describes the syntax for the setting. After the Subscription Manager setting has been added, run the following command to ensure the policy is applied: `gpupdate /force`. If you want to configure a source computer-initiated subscription, you need to configure the following group policies on the computers that will act as the event forwarders: (A) Configure Target Subscription Manager. This policy enables you to set the location of the collector computer.
