In other words, the Media-Cloud-Consultant test questions promises you get the certification 100% as long as you have studied the material seriously, Our practice questions and answers have high accuracy.

NEW QUESTION: 1A. Option DB. Option BC. Option CD. Option A
Answer: C
Explanation: If you've used a web-based email service such as Outlook, Hotmail, or Yahoo! Mail, then you've already used a form of SaaS. With these services, you log into your account over the Internet, often from a web browser. The email software is located on the service provider's network, and your messages are stored there as well. You can access your email and stored messages from a web browser on any computer or Internet-connected device.

NEW QUESTION: 2
Answer: Explanation: Explanation
References:
<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-plan-design>

NEW QUESTION: 3 Your network contains an Active Directory domain named adatum.com. The domain contains a server named Server5. You install the Remote Desktop Services (RDS) server role and all of the RDS role services on Server5. Another administrator disables Fair Share CPU Scheduling on Server5. You need to enable Fair Share CPU Scheduling on Server5. Which tool should you use?
A. Windows System Resources Manager (WSRM)
B. Remote Desktop Gateway Manager
C. Netsh
D. Rdpinit
E. RdpSIGN
F. Dism
G. Regedit
H. Remote Desktop Services Manager
I. Remote Desktop Session Host Configuration
J. Remote Desktop Connection Manager
K. Mstsc
Answer: G
Explanation: Fair Share CPU Scheduling is a new feature included with Remote Desktop Services in Windows Server 2008 R2. Fair Share CPU Scheduling dynamically distributes processor time across sessions based on the number of active sessions and load on those sessions by using the kernel-level scheduling mechanism included with Windows Server 2008 R2. On an RD Session Host server, one user will not affect the performance of another user's session, even if the RD Session Host server is under a high load. Fair Share CPU Scheduling is enabled by default. You can disable this feature by configuring the following registry entry to 0:
HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\SessionManager\DFS\EnabledDFS
