**NEW QUESTION: 2** Which tasks is the session management path responsible for? (Choose three.) **A.** Checking TCP sequence numbers **B.** Performing session lookup **C.** Checking packets against the access list **D.** Performing route lookup **E.** Verifying IP checksums **F.** Allocating NAT translations **Answer: C, D, F** Explanation: Explanation The ASA has to check the packet against access lists and perform other tasks to determine if the packet is allowed or denied. To perform this check, the first packet of the session goes through the "session management path," and depending on the type of traffic, it might also pass through the "control plane path." The session management path is responsible for the following tasks: + Performing the access list checks + Performing route lookups + Allocating NAT translations (xlates) + Establishing sessions in the "fast path" Source:
