**NEW QUESTION: 1**You have a Microsoft SQL Server instance that hosts a database named DB1 that contains 800 gigabyte (GB) of data. The database is used 24 hours each day. You implement indexes and set the value of the Auto Update Statistics option set to True. Users report that queries take a long time to complete. You need to identify statistics that have not been updated for a week for tables where more than 1,000 rows changed. How should you complete the Transact-SQL statement? To answer, configure the appropriate Transact-SQL segments in the answer area.**Answer:** Explanation: ExplanationBox 1: stats\_date See example below. Box 2: rowmodctr See example below. Box 3: stats\_date You need to identify statistics that have not been updated for a week. Box 4: rowmodctr You need to identify that more than 1,000 rows changed. Rowmodctr counts the total number of inserted, deleted, or updated rows since the last time statistics were updated for the table. Example: We will query every statistics object which was not updated in the last day and has rows modified since the last update. We will use the rowmodctr field of sys.sysindexes because it shows how many rows were inserted, updated or deleted since the last update occurred. Please note that it is not always 100% accurate in SQL Server 2005 and later, but it can be used to check if any rows were modified.--Get the list of outdated statistics SELECT OBJECT\_NAME(id), name, STATS\_DATE(id, indid), rowmodctr FROM sys.sysindexes WHERE STATS\_DATE (id, indid) <= DATEADD(DAY, -1, GETDATE()) AND rowmodctr > 0 AND id IN (SELECT object\_id FROM sys.tables) GO After collecting this information, we can decide which statistics require an update. **NEW QUESTION: 2**Your company uses several bots. The bots use Azure Bot Service. Several users report that some of the bots fail to return the expected results. You plan to view the service health of the bot service. You need to request the appropriate role to access the service health of the bot service. The solution must use the principle of least privilege. Which role should you request?**A.** the Contributor role on the Azure subscription**B.** the Owner role on the bot service**C.** the Reader role on the bot service**D.** the Reader role on the Azure subscription  
**Answer: A**

**NEW QUESTION: 3** The Orders form has three blocks: Orders, Orders\_Items, and inventories. It also has a button labeled Next Block with a When-Pressed trigger. IF :SYSTEM.cursor\_block = 'orders' THEN GO\_BLOCK('order\_items'); ELSIF :SYSTEM.cursor\_block = 'order\_items' THEN GO\_BLOCK('inventories'); ELSIF :SYSTEM.cursor\_block = 'inventories' THEN GO\_BLOCK('orders'); END IF; The button is not functioning correctly; it does not cause navigation to occur. What must you do to fix the issue? **A.** Use system variables in the GO\_BLOCK statements. **B.** Change the block names to uppercase in the condition (IF ... THEN) statements. **C.** Move the code to a PL/SQL program unit. **D.** Change the block names to uppercase in the GO\_BLOCK statements. **E.** instead of naming the block to navigate to, replace the GO\_BLOCK built-in with NEXT\_BLOCK. **F.** Change all occurrences of :SYSTEM.cursor\_block to :SYSTEM.trigger\_block.  
**Answer: F**  
**Explanation:** Explanation: SYSTEM.trigger\_block: The block that the input focus was in when the trigger initially fired. Note: Uses for Trigger Focus Variables The variables for locating trigger focus are useful for navigating back to the initial block, record, and item after the trigger code completes. For example, the trigger code may navigate to other blocks, records, or items to perform actions upon them, but after the trigger fires, you may want the cursor to be in the same item instance that it was in originally. Because the navigation in the trigger occurs behind the scenes, the user will not even be aware of it.

**NEW QUESTION: 4** The Outcome Management activity workspace consists of which of the following panels? **A.** Content panel **B.** Details panel **C.** Recommendations panel **D.** Agreement panel **E.** Factor panel **Answer: A,B,C**
