**NEW QUESTION: 3** Your company network has two physical locations configured in a geo-clustered environment. You create a Blob storage account in Azure that contains all the data associated with your company. You need to ensure that the data remains available in the event of a site outage. Which storage option should you enable?  
**A.** Geo-redundant storage  
**B.** Zone-redundant storage  
**C.** Locally redundant storage  
**D.** Read-only geo-redundant storage

**Answer: D**  
Explanation: Explanation Read-access geo-redundant storage (RA-GRS) maximizes availability for your storage account, by providing read-only access to the data in the secondary location, in addition to the replication across two regions provided by GRS. When you enable read-only access to your data in the secondary region, your data is available on a secondary endpoint, in addition to the primary endpoint for your storage account.
