NEW QUESTION: 1You need To configure the Group Policy for salespeople.Solution: You move all shared desktops to a separate organizational unit (OU). You create one Group Policy object (GPO) that has an AppLocker policy rule and enable loopback policy processing within the GPO. You link the GPO to the new OU.Does this meet the goal?**A. No****B. Yes****Answer: A****Explanation:** Topic 7, Line-of-business applicationsBusiness RequirementsLine-of-business applicationsA line-of-business (LOB) application named App1 is deployed on LA-SVR01 and LASVR02.Backups All company data is temporarily backed up by using snapshots, and then archived to long-term media. When possible, metadata and non-critical information must be stored by using AD DS. MonitoringSystem Center is used as the primary monitoring tool for server and application performance.The company also plans to monitor core services, such as DNS, DHCP, and AD DS. Anyadditional monitoring capabilities must be performed by using System Center.Active DirectoryThe company plans to use Active Directory to store personal information for employees. Users in the branch offices must not be able to view the confidential data that is stored for other users.File sharesThe NY-SVR05 server acts as the primary file server in the domain. File shares are replicated to LA-SRV03. Client computers use NY-SRV05 to access file in the file share, BranchCache distributed mode is enabled in each branch office. Each client computer has a 250-GB hard drive that is used by the Local Cache. BranchCache must be able to use up to 10% of the 250-GB hard drive for the local cache.ConsolidationThe company plans to consolidate the amount of servers that are in both data centers. Company management needs to generate a report that describes how consolidation will affect power and cooling costs in the data center.Technical RequirementsServer deploymentsThe existing Microsoft Azure

environment does not have the ability to expand automatically. The Azure environment must support the ability to deploy additional virtual machines (VMs) automatically. The on-premises deployment environments must deploy only to trusted computers. When possible, System Center must be used to deploy and manage the on-premises and Azure environments. System Center must also be used to migrate existing virtual machines from VMM to Azure. Monitoring The DHCP service must be monitored and reported if the service stops or restarts. Additionally, DHCP scope and Network Access Protection (NAP) related events must be monitored. Azure migration The company plans to migrate existing services, including System Center management servers, to Azure. To reduce costs, the migration must use the minimum number of Azure VM instances to migrate the services. App1 App1 uses a DNS application directory partition on LA-DC01 and NY-DC01. App1 uses IPv6 for network connectivity and must resolve single-label names for resources in the woodgrovebank.com DNS zone. GlobalNames zone has been created, but the zone has not been populated with resource records. Active Directory Domain Services The company plans to use the Employee-Number user property to store personal identification numbers. File shares Each branch office connects to the New York data center to retrieve file shares. BranchCache distributed mode is enabled in each branch office. The cache on each client computer must be a single file. Consolidation reports The company requires a report that describes the impact of consolidation. The report must provide the following information:- An inventory of the existing physical server environment- Visual charts that show the reduction of physical servers
