By using our Microsoft AZ-120 study guide, a bunch of users passed exam with high score and the passing rate has reached up to 95 to 100 percent recent years.

NEW QUESTION: 1 The ISO/IEC 27001:2005 is a standard for:**A.** Certification of public key infrastructures**B.** Implementation and certification of basic security measures**C.** Evaluation criteria for the validation of cryptographic algorithms**D.** Information Security Management System**Answer: D**Explanation:The ISO 27000 Directory at: http://www.27000.org/index.htm has great coverage ofthe ISO 27000 series. The text below was extracted from their website.As mention by Belinda the ISO 27001 standard is the certification controls criteria while ISO 27002 is the actual standard. ISO 27002 used to be called ISO 17799 before being renamed.An Introduction To ISO 27001 (ISO27001)The ISO 27001 standard was published in October 2005, essentially replacing the old BS7799-2standard. It is the specification for an ISMS, an Information Security Management System.BS7799 itself was a long standing standard, first published in the nineties as a code of practice. Asthis matured, a second part emerged to cover management systems. It is this against whichcertification is granted. Today in excess of a thousand certificates are in place, across the world.ISO 27001 enhanced the content of BS7799-2 and harmonized it with other standards. A schemehas been introduced by various certification bodies for conversion from BS7799 certification toISO27001 certification.The objective of the standard itself is to "provide a model for establishing, implementing,operating, monitoring, reviewing, maintaining, and improving an Information Security Management System". Regarding its adoption, this should be a strategic decision. Further, "The design and implementation of an organization's ISMS is influenced by their needs and objectives, security requirements, the process employed and the size and structure of the organization".The standard defines its 'process approach' as "The application of a system of processes withinan organization, together with the identification and interactions of these processes, and their management". It employs the PDCA, Plan-Do-Check-Act model to structure the processes, and reflects the principles set out in the OECG guidelines (see oecd.org).THE CONTENTS OF ISO 27001The content sections of the standard are:Management ResponsibilityInternal AuditsISMS ImprovementAnnex A - Control objectives and controlsAnnex B - OECD principles and this international standardAnnex C - Correspondence between ISO 9001, ISO 14001 and this standardIntroduction To ISO 27002 (ISO27002)The ISO 27002 standard is the rename of the ISO 17799 standard, and is a code of practice forinformation security. It basically outlines hundreds of potential controls and control mechanisms,which may be implemented, in theory, subject to

the guidance provided within ISO 27001.The standard "established guidelines and general principles for initiating, implementing,maintaining, and improving information security management within an organization". The actualcontrols listed in the standard are intended to address the specific requirements identified via aformal risk assessment. The standard is also intended to provide a guide for the development of"organizational security standards and effective security management practices and to help buildconfidence in inter-organizational activities".The basis of the standard was originally a document published by the UK government, whichbecame a standard 'proper' in 1995, when it was re-published by BSI as BS7799. In 2000 it wasagain re-published, this time by ISO ,as ISO 17799. A new version of this appeared in 2005, along with a new publication, ISO 27001. These two documents are intended to be used together, with one complimenting the other. ISO's future plans for this standard are focused largely around the development and publication of industry specific versions (for example: health sector, manufacturing, and so on). Note that this is a lengthy process, so the new standards will take some time to appearTHE CONTENTS OF ISO 17799 / 27002 The content sections are:Structure Risk Assessment and Treatment Security Policy Organization of Information Security Asset Management Human Resources Security Physical Security Communications and Ops Management Access Control Information Systems Acquisition, Development, Maintenance Information Security Incident management Business Continuity Compliancehttp://www.iso.org/iso/catalogue_detail?csnumber=42103 and The ISO 27000 Directory at http://www.27000.org/index.htm

NEW QUESTION: 2
組織には2つの法人があります。アイテムは、1つの会社または両方の会社によって販売される場合があります。法人全体でアイテムを標準化するソリューションを推奨する必要があります。何を勧めますか？**A.** 製品と製品マスター**B.** 製品の洞察**C.** ライフサイクルサービス**D.** アイテムテンプレート**Answer: A**Explanation:Reference: https://docs.microsoft.com/en-us/dynamics365/supply-chain/pim/tasks/release-product-product-master-legal-entities

NEW QUESTION: 3 Your network is configured as shown in the exhibit. (Click the Exhibit button.)Server1 regularly accesses Server2.You discover that all of the connections from Server1 to Server2 are routed through Router1.You need to optimize the connection path from Server1 to Server2.Which route command should you run on Server1?**A.** Route add -p 10.10.10.0 MASK 255.255.255.0172.23.16.2 METRIC 100**B.** Route add -p10.10.10.12 MASK 255.255.255.0 10.10.10.0 METRIC 50**C.** Route add -p 10.10.10.12 MASK 255.255.255.0 10.10.10.1 METRIC 100**D.** Route add -p 10.10.10.0 MASK 255.255.255.0 10.10.10.1 METRIC 50**Answer: A** Explanation:Explanation/Reference:Explanation:Destination - specifies either an IP address or host name for the network or host.subnetmask - specifies a subnet mask to be associated with this route entry. If subnetmask is not specified, 255.255.255.255 is used.gateway - specifies either an IP address or host name for the gateway or router to use when forwarding.costmetric - assigns an integer cost metric (ranging from 1 through 9,999) to be used in calculating the fastest, most reliable, and/or least expensive routes. If costmetric is not specified, 1 is used. interface - specifies the interface to be used for the route that uses the interface number. If an interface is not specified, the interface to be used for the route is determined from the gateway IP address.References:http://support.microsoft.com/kb/299540/en-us http://technet.microsoft.com/en-us/library/cc757323%28v=ws.10%29.aspx
