NEW QUESTION: 1Hyperledger Composer has the following two main components.**A.** Composer Framework and a Business Network Archive**B.** Composer Playground and a Business Network Archive**C.** Composer Playground and a Business Network Configuration**D.** Distributed Ledger and a Business Network Archive**E.** Distributed Ledger and Composer playground
Answer: BExplanation:Explanation/Reference:Explanation:There are two parts: 1. Business Network Archive which essentially captures the core data in a business network, including the business model, transaction logic, and access controls, the Business Network Archive packages these elements up and deploys them to a runtime. Business Network Archive files are stored as ".bna" files. AND 2. Composer Playground which is web-based tool allows developers to learn Hyperledger Composer, model out their business network (domain), test that network, and deploy that network to a live instance of a blockchain network. The playground keeps the development model in browser storage, allowing them to be easily uploaded or downloaded.
