And the Marketing-Cloud-Advanced-Cross-Channel test practice question has been checked by all kinds of people except our professional team also includes the elites of various fields who pass the exam through the Accredited Professional Marketing-Cloud-Advanced-Cross-Channel exam dump.

NEW QUESTION: 1What is the default interval at which Cisco devices send Cisco Discovery Protocol advertisements?**A.** 30 seconds**B.** 120 seconds**C.** 300 seconds**D.** 60 seconds**Answer: D**
Explanation: Cisco Discovery Protocol is a Layer 2, media-independent, and network-independent protocol that networking applications use to learn about nearby, directly connected devices. Cisco Discovery Protocol is enabled by default. Each device configured for Cisco Discovery Protocol advertises at least one address at which the device can receive messages and sends periodic advertisements (messages) to the well-known multicast address 01:00:0C:CC:CC:CC. Devices discover each other by listening at that address. They also listen to messages to learn when interfaces on other devices are up or go down. Advertisements contain time-to-live information, which indicates the length of time a receiving device should hold Cisco Discovery Protocol information before discarding it. Advertisements supported and configured in Cisco software are sent, by default, every 60 seconds. Reference: <http://www.cisco.com/en/US/docs/ios-xml/ios/cdp/configuration/15-mt/nm-cdpdiscover.html>

NEW QUESTION: 2

Subscription1という名前のAzureサブスクリプションと、Tenant1という名前の関連するAzure Active Directory (Azure AD) テナントを作成します。
