Scaled Agile SAFe-APM All Questions and Answers Tested and Approved Scaled Agile Framework Data Center SAFe-APM Exams, On the premise of high-quality dumps PDF materials, the after-sale service must be taken into consideration.

Using a smartphone, you may go through the Scaled Agile SAFe-APM exam questions whenever and wherever you desire.

NEW QUESTION: 1 SIMULATION Click to expand each objective. To connect to the Azure portal, type `https://portal.azure.com` in the browser address bar. When you are finished performing all the tasks, click the `Next` button. Note that you cannot return to the lab once you click the `Next` button. Scoring occurs in the background while you complete the rest of the exam.

Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You plan to deploy several Azure virtual machines and to connect them to a virtual network named VNET1007. You need to ensure that future virtual machines in VNET1007 can register their name in an internal DNS zone named `corp7523690.com`. The zone must NOT be hosted on a virtual machine. What should you do from Azure Cloud Shell? To complete this task, start Azure Cloud Shell and select PowerShell(Linux). Click Show Advanced Settings, and then enter `corp7523690n1` in the Storage account text box and `File1` in the File share text box. Click Create storage, and then complete the task.

A. See solution below explanation
Answer: A
Explanation: Step 1: `New-AzureRMResourceGroup -name MyResourceGroup` Before you create the DNS zone, create a resource group to contain the DNS zone. Step 2: `New-AzureRmDnsZone -Name corp7523690.com -ResourceGroupName MyResourceGroup` A DNS zone is created by using the `New-AzureRmDnsZone` cmdlet. This creates a DNS zone called `corp7523690.com` in the resource group called `MyResourceGroup`.

NEW QUESTION: 2 How can you protect CDP from reconnaissance attacks?
A. Disable CDP on trunk ports.
B. Enable dynamic ARP inspection on all untrusted ports.
C. Disable CP on ports connected to endpoints.
D. Enable dot1x on all ports that are connected to other switches.

Answer: C

NEW QUESTION: 3 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You develop an ASP.NET web application that is self-hosted using Open Web Interface for .NET (OWIN) in a Microsoft Azure Worker role. The web application throws exceptions. You need to resolve the exceptions. Solution: Change the application startup code to debug the OWIN pipeline. Does the solution meet the goal?
A. No
B. Yes
Answer: A Explanation: We need to install the Microsoft.Owin.Diagnostics package before we change the startup code. The Microsoft.Owin.Diagnostics package contains middleware that catches unhandled exceptions and displays an HTML page with error details. References: <https://docs.microsoft.com/en-us/aspnet/aspnet/overview/owin-and-katana/getting-started-with-owin-and-katana#add-owin-diagnostics>

NEW QUESTION: 4 Last year, Company X sold \$590,000 on account. The company estimated that 3 percent of sales on account would become uncollectible. During the year the company wrote off \$29,000 of uncollectible accounts receivable. What should the bad debt expense be last year?
A. None of them.
B. 17,700
C. 11,300
Answer: B Explanation: $3\% * \$590,000 = \$17,700$.
