NEW QUESTION: 1 Which three statements about thick provisioning are true? (Choose three.)
A. The size of the VMDK, at any point in time, is as much as the amount of data written out from the VM.
B. The entire disk space is reserved and is unavailable for use by other virtual machines.
C. Unused space is available for use by other virtual machines.
D. Disk has all space allocated at creation time.
E. Operates by allocating disk storage space in a flexible manner among multiple users, based on the minimum space required by each user at any given time.
F. Before writing to a new block, a zero must be written.
Answer: B,D,F
Explanation: Explanation/Reference:
Explanation: A thick disk has all space allocated at creation time. This space may contain stale data on the physical media. Before writing to a new block a zero has to be written, increasing the IOPS on new blocks compare to Eager disks. The entire disk space is reserved and unavailable for use by other virtual machines.
