You need to plan the network's security so that it complies with the company's security policy. What should you include in your plan?**A.** Create an extranet domain within the same forest. If a client is not compliant, NAP provides a mechanism for automatically bringing the client into compliance (a process known as remediation) and then dynamically increasing its level of network access. NAP is supported by Windows Server 2008 R2, Windows Server 2008, Windows 7, Windows Vista, and Windows XP SP3.
