Our company is aimed at relieving your pressure **CIPM Original Questions** from heavy study load, You can use the practice test software to test whether you have mastered the CIPM test practice materials and the function of stimulating the exam to be familiar with the real exam's pace.

NEW QUESTION: 1あなたはMicrosoft SQL Server環境でのデータベース管理者です。

あなたは少なくとも5つの異なるSQL

Serverインスタンスへのワークロードをスケールアウトする新しいアプリケーションを配備したいと思います。

あなたはデータベースのコピーごとに、ユーザーはデータベースのすべてのインスタンス間で同期されるデータを読み書きすることが可能であることを確認する必要があります。

どの機能を使用すべきか。**A.** peer-to-peer replication**B.** snapshot replication**C.** failover

clustering**D.** database audits**Answer: A**Explanation:ExplanationPeer-to-peer replication

provides a scale-out and high-availability solution by maintaining copies of data across multiple server instances, also referred to as nodes. Built on the foundation of transactional replication, peer-to-peer replication propagates transactionally consistent changes in near real-time. This enables applications that require scale-out of read operations to distribute the reads from clients across multiple nodes. Because data is maintained across the nodes in near real-time, peer-to-peer replication provides data redundancy, which increases the availability of data. Although peer-to-peer replication enables scaling out of read operations, write performance for the topology is like that for a single node. References:

<https://docs.microsoft.com/en-us/sql/relational-databases/replication/transactional/peer-to-peer-transactional-repl>

NEW QUESTION: 2Refer to the exhibitWhich statements about this CPU ACL is true?**A.** A user on the 10.64.0.0/24 network cannot use telnet to access the WLC 172.21.159..37**B.** A user on the 10.64.0.0/24 network can use SSH to access the WLC.**C.** Any user on any other subnet can access the WLC.**D.** A User on the 10.64.0.0/24 network cannot use HTTPS to access the WLC GUI

Answer: A

NEW QUESTION: 3You have an Exchange Server 2010 organization. Users have mobile devices that run Windows Mobile 6.1.You need to plan a solution to meet the following requirements:

-Ensure that users in the legal department can delete data from a mobile device if it is stolen

-Ensure that only administrators can perform remote wipes on all other mobile devicesWhat should you include in the plan?**A.** Create multiple Exchange ActiveSync policies.**B.** Implement

Active Directory Rights Management Services (AD RMS).**C.** Upgrade all mobile devices to Windows Mobile 6.5.**D.** Create multiple Outlook Web App (OWA) mailbox policies.**Answer: A**

Explanation:=====Exchange Server 2010 supports mobile messaging on a variety of mobile devices, but not all devices support all messaging features. Microsoft considers Windows Mobile 6.1 and 6.5 to be fully provisionable, but older versions of Windows Mobile and non-Windows OSes can't enforce some of the security settings found in the ActiveSync Mailbox Policy.=====I had both A and C as the correct answer however I feel only A is needUnderstanding Outlook Web App Mailbox PoliciesApplies to: Exchange Server 2010 SP2Use Microsoft Office Outlook Web App mailbox policies to create organization-level policies to manage access to features in Outlook Web App. Outlook Web App mailbox policies allow you to create multiple policies at the organization level and apply them to individual mailboxes. Looking for management tasks related to Outlook Web App mailbox policies? See Managing Outlook Web App Mailbox Policies.In Exchange 2010, you can create multiple Outlook Web App mailbox policies and apply them to individual mailboxes. When an Outlook Web App mailbox policy is applied to a mailbox, it will override the settings of the virtual directory. In previous versions of Exchange, Outlook Web App features were managed by configuring the Outlook Web App virtual directories. Exceptions for individual mailboxes were accommodated by enabling or disabling features on individual mailboxes. Configuring Outlook Web App Mailbox PoliciesA default Outlook Web App mailbox policy is created automatically when the Client Access server role is installed. By default, all options are enabled on the default Outlook Web App mailbox policy. You can create as many Outlook Web App mailbox policies as necessary to meet the needs of your organization.Note:The default Outlook Web App mailbox policy is not automatically applied to any mailboxes.For example, you may want to create a policy that forces users to use WebReady Document Viewing to view attachments or a policy that limits users to the Light version of Outlook Web App. You can use the Exchange Management Console or the Exchange Management Shell to create and configure Outlook Web App mailbox policies. Applying Outlook Web App Mailbox PoliciesOnly one Outlook Web App mailbox policy can be applied to a mailbox.If there's no Outlook Web App mailbox policy applied to a mailbox, the settings defined on the virtual directory will be applied.An Outlook Web App mailbox policy can be applied to a mailbox as part of the new mailbox wizard, by using the EMC to modify an existing mailbox, or by using the Shell and the Set-CASMailbox cmdlet to apply a mailbox policy.<http://technet.microsoft.com/en-us/library/dd335142.aspx>
